

**An appreciation letter of an “Iranian born” Canadian refugee,
to Canada’s government.**

Riza Satisfied

An appreciation letter of an “Iranian born” Canadian refugee, to Canada’s government.

I am Abdorreza Ghahramany Dolama. I was born in Iran.

I didn’t have smart mind, but I had some great ideas.

My father was a builder.

I was working with my father, in construction works in summer seasons.

Like this I got familiar with building maps and building works.

I got electricity diploma, and then I got building map drawing degree.

Then I became a builder.

I was an ordinary builder till age of forty.

In my life two times, I decided to emigrate to Canada or to Australia.

But, mediators ate my money and I couldn’t emigrate.

I got familiar with spiritual in age of forty.

And I saw some dreams in my deep sleep that:

God will destroy Islamic clergies and Islamic regime by me.

And God will establish World society by me.

I wasn’t a writer, but I began to writing.

Islamic clergies arrested me, and they jailed me, in different jails,

and they tortured and harassed me too much.

Clergies forcibly told to me deny your writings and write repentance,

I several times denied my writings and I wrote repentances.

Then I escaped from Iran to Turkey.

In Turkey United nation accepted me as a refugee.

In Turkey, again I began to writing my writings.

For establishing of World society it was required to be deleted,

between countries borders and weapons of borders.

I deleted and removed between countries irregular borders.

After deleting of irregular borders.

I divided on earth to 24 parts based on Meridional divisions.

Now in our World there are various different paths and religions,
and all of paths respectively have been told,
or have been written by prophets.

And people of every period, have been connected with God
and have reached to salvation by own periods' prophet,
and own period's path.

Now clergies and followers of all paths, and religions,
have become dependent and fanatic to own paths and religions,
and they fight with together and with others.

(Path + bias and dependence it is = pest).

So a follower of each path, and each religion that,
has bias and dependence to own path and religion,
he or she cannot connect, own and others, with god.

And cannot make salvation people.

And also their prophet isn't among of them, till say for them,
you are astray, and astray person cannot guide others.

For establishing of World society,
and continuing of peace in world,
it was required to be written and to be learned,
a new version of God's path, instead of all of old paths and religions,
till people can connect with God and become salvation.

Till people can live in peace with together like a family and like a nation.

And this is goal of the god and path in this period of the history.

And with the god's help I wrote that new path.

And now there are various numbers of holy places in the world.
And some of those holy places, respectively have been made,
by the own periods' prophets.

And most of the holy places also have been made by the clergies,
and followers of the paths and religions.

And goal of every holy place is connecting the people with the god,
and makes salvation the people.

But Clergies and followers of paths and religions have become dependence and fanatic to own holy places.

(Holy place + bias and dependence it is = factors of divisive and war).

Holy place that becomes cause of division and war between followers, it cannot connect people to God, and it cannot make salvation people.

And also prophet of that Holy place isn't in among of own followers, till say to them, your Holy place is cause of division, and war between people, and to order to them destroy that Holy place.

So for World society will be made a very big and very high Holy place that, it is belongings to each religious and materialist,

it is belongings to each literate and illiterate, each poor and each rich.

And World society's Holy place isn't belonging to a special religious and to a special materialist group, it isn't belongings to a special person, and special group, special dress, special arm and to a special beard, it isn't belonging to a special race and to a special nation.

And location of World society's Holy place has been determined, and its maps have been planned designed and have been drawn.

Some speech about my refuge:

First, United Nation recommended me to American country.

American government was interviewing about one hour, with refugee applicants, but they interviewed with me, about three hours and a half, and then they rejected my refuge applicant.

Second: United nation recommended me to Australian country.

Australia's government was interviewing about one hour, with applicants of refugee.

But, they interviewed with me more than three hours and a half, and then they rejected my refugee applicant.

I was peace theorist.

I loved followers of all paths and religions equally,

I wasn't advocate of one and enemy of other.

And I loved all countries' nations and governments equally.
 I wasn't advocate of one country and enemy of other country.
 And I loved all materialists and religious equally like my family.
 American and Australian government rejected my refugee applicant.
 But anyway we refugees thank from American and Australian government and their people, because, they have accepted many refugees' applicants from many countries during of some past years.

Third: United Nation recommended me to Canada's country,
 Canada's government was interviewing about 15 minutes,
 with applicants of refugee, but they interviewed with me,
 about three hours and a half.

In my inner I told with myself that:
 Maybe it is not need I travel more than this?
 Maybe I will be deported from Turkey to Iran?
 If I was being deported hundred percent, I was going to jail.
 Because, I had escaped from Islamic workers' jail.
 These thinks were passing from my mind that,
 embassy's staff told: Canada's government accepted your refuge's applicant.
 I thanked from Canada's embassy's staff.

And also Canada's government helped me as much as my housing rent.
 And this assistance caused till I could complete my writings.
 In Canada I wrote and typed my books to Persian and English language,
 in during of these some years.

And I drew maps of World society's countries,
 maps of World society's capital city.
 And I drew maps of World society's administration building.
 I thank and appreciate from Canada's government and Canada's people.

And in end, I tell a speech to all people of world:
 In this world all of us are refugee, and passenger, so we don't be dependence
 and fanatic, to our path, our country, our language, our race and to our
 belongings, till we can be free glad and safe. (Riza Satisfied)
